Experience

CloudKeeper India | *Devops Engineer* Jan 2026 - Present | Noida, India

Cloud Reliability Engineering

- Provided **AWS Partner-led technical support and troubleshooting** for cloud infrastructure, access, networking, and AWS service-related issues.
- Supporting **cloud infrastructure provisioning and management** across AWS environments.
- Working on AWS cloud services including EC2, RDS, VPC, ECS, QuickSight, IAM, CloudWatch, S3, and Route 53.
- Contributing to **CI/CD pipeline automation** and deployment processes using **Jenkins**.
- Supporting containerised application deployments using **Docker, ECS, and Kubernetes**.
- Monitoring system health, logs, and performance using **CloudWatch and observability practices**.
- Assisting in maintaining security, reliability, and operational efficiency of cloud workloads.

Vancare India | *Full Stack Developer* *August 2025* | Ghaziabad, India

Internship

- Developed and maintained the website using **React.js, Node.js, with Supabase for authentication**, and storage.
- Handled Domain purchase, DNS configuration and publishing on company's official Domain.
- Developed **REST API's using Node.js** to manage user authentication, product data and business operations.

AZF Foods | *Full Stack Developer* *June 2025* | *Melbourne, Australia*

Internship

- Build a **product-centric website** using React.js for AZF foods.
- Deployed on **GoDaddy with domain and DNS configurations** for smooth hosting, developed backend API's using Node.js to manage product data.

Skills

Languages & Frameworks: Java, C, HTML5, CSS, JavaScript, SQL, React.js, Node.js
Databases: MySQL, MongoDB, Firebase, PostgreSQL
Tools & Technologies: Jenkins, Grafana, GIT, Cursor, Copilot, Linux
Concepts: Data Structures & Algorithms, CI/CD, Kubernetes, Docker
Cloud: Amazon Web Services (AWS), Google Cloud Platform (GCP)

Education

KIET Group of Institutions, Ghaziabad 2024 - 2026
Master's of Computer Applications (MCA) *CGPA: 9.2/10*

Jagan Institute of Management Studies (GGSIPU) 2021 - 2024
Bachelor's of Computer Applications (BCA) *CGPA: 9.5/10*

Projects

ELK Log Pipeline | Devops & Observability Project | Docker, ELK Stack, Filebeat May 2026
*Designed and implemented a centralized log management and monitoring pipeline using the ELK Stack (Elasticsearch, Logstash, Kibana).Configured **Filebeat** to collect application logs and forward them to **Logstash** for processing, Visualized and analysed logs using **Kibana dashboards** for monitoring and troubleshooting, Integrated a sample **Node.js application** to generate and monitor application logs in real time.*

Vectis DB | PostgreSQL Bloat Monitor | AWS EC2, RDS, OpenAI/ Git, Docker May 2026
Developed a full-stack architecture using React + FastAPI, integrated AI-powered SQL analysis for query optimization, and implemented secure database communication with connection pooling and SQL sanitization.

Agri India Foods | Website Developer | React.js, Tailwind, Email.js August 2025
Developed a freelance real life project with Agriindiafoods, a rice import company.

Awards & Certifications

- **2024:** 1st Rank - Gold Medalist BCA'24
- Introduction to networks by Cisco Networking Academy
- **Finalist -** Smart India Hackathon'22
- **Publication -** Research paper in International ERPA journal on E- Waste Management
